270: PITCH 1.7mm
300: PITCH 2.5mm

The bamboo saws are especially designed to cut bamboo without tearing the outer fiber of the stock. Moreover, it can cut the small branches like a grapevine.

KAJU

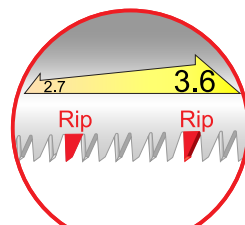

The cutting performance is ideal for pruning trees. Even on the thin and flexible branches. To enable a clean cutting surfaces.

SENTEI

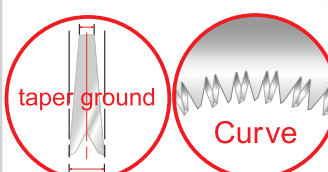

The taper-ground blade to cut the green wood is for excellent cutting performance.

NAMAKI

Differential toothing (tooth size increases towards the tip of the blade) allows smooth, fast cuts to be made.

EDAUCHI

The curved and taper-ground blade ensures particularly high performance, capable of dealing with even thick branches.
